PROJECTS

• CHATGPT(CLONE)

june- 2023

I developed a clone of chatGPT with HTML, CSS, and JS which responds to user queries.

• WEATHER APPLICATION (API)

Feb - 2023

I did this project using rapid API and Bootstrap in which users can search for the weather of any city.

• ALEXA USING PYTHON

Dec - 2022

I developed an Alexa using Python that takes user commands and performs actions with a male voice, it can play songs, browse, and send WhatsApp messages according to the user's command.

• TODO-APP (DJANGO)

Jan - 2023

I developed a TODO web-app using Django in which users can add, delete or update a task.

EXPERIENCE

- I had experience as a student volunteer at International Conference on Artificial Intelligence Security and Communication
- I had experience as a community service project leader
